

# Open access publishing available here

You can enjoy the benefits of open access (OA) publishing thanks to a transformative agreement between your institution and IOP Publishing. The agreement covers OA publications in the majority of IOP Publishing journals for corresponding authors at your institution, as well as read access to some of the world's best physical sciences research.

### It's as simple as this:

Go to the journal of your choice and click on the submit button, or use our Journal Finder tool to find a suitable journal for your research.

Submit your manuscript to an eligible journal as the corresponding author and ensure your affiliation information is accurate.

We will automatically contact you if your article is eligible, and provide details of funding availability.

Sign the CC BY licence, and if your article is accepted and eligible, it will be published OA at no cost to you and with no administrative burden.

### Enjoy all the benefits of open access:

#### Get greater exposure

# 81%

OA article downloads are 81% higher than non-OA articles on average.

#### Comply with grant obligations

Research will comply with any funder mandates for OA.

#### Be the word on the street

# 27%

Altmetric scores are 27% higher for OA articles than non-OA articles.

#### Publish under a CC-BY 4.0 licence

The most commonly used licence for gold OA publishing, which has liberal reuse rights attached to it.

#### Achieve a higher impact

# 31%

Citations for OA articles are 31% higher on average than non-OA articles.

#### High-quality peer-review and production services

IOP Publishing is committed to maintaining high-value and trustworthy author and reader services throughout its entire journal portfolio.
