

Open access publishing is available

You can enjoy the benefits of open access (OA) publishing thanks to a transformative agreement between your institution and IOP Publishing. The agreement covers OA publications in the majority of IOP Publishing journals for corresponding authors at your institution, as well as read access to some of the world's best physical sciences research.

It's as simple as this:

Use our Journal Finder or select an eligible journal of your choice and click on the submit button.

As the corresponding author, complete the submission process and ensure your affiliation details are correct.

Confirm your funder. When your article is accepted you will receive an e-mail from SciPris asking you to log in and confirm you'd like to be funded under the agreement.

Your paper will be published under a CC BY copyright at no cost to you.

Enjoy all the benefits of open access:

Get greater exposure

70%

OA article downloads are on average 70% higher than non OA articles in the same journal.

Achieve a higher impact

12%

OA article citations are on average 12% higher than non OA articles in the same journal.

Be the word on the street

28%

OA article Altmetric scores are on average 28% higher than non OA articles in the same journal.

Publish under a CC-BY 4.0 licence

The most commonly used licence for gold OA publishing, which has liberal reuse rights attached to it.

Comply with grant obligations

Research will comply with any funder mandates for OA.

High-quality peer-review and production services

IOP Publishing is committed to maintaining high-value and trustworthy author and reader services throughout its entire journal portfolio.
